Arteriosclerosis

AN OFFICIAL JOURNAL OF THE AMERICAN HEART ASSOCIATION

Index to Volume 7
January-December 1987

Subject Index

A

Accumulation

Enhanced accumulation and turnover of esterified cholesterol in injured rabbit aorta, 367

Acetyl low density lipoprotein receptor

Decrease in reactive amino groups during oxidation or endothelial cell modification of LDL. Correlation with changes in receptor-mediated catabolism, 135

Acetylated low density lipoprotein

Accumulation of cholesteryl ester and lipid droplets in macrophages after uptake of cholesterol-rich necrotic products, 185

Adrenal gland

Accumulation of native and methylated low density lipoproteins by healing rabbit arterial wall, 361

Age

Glycosaminoglycans and apolipoproteins B and A-I in human aortas. Chemical and immunological analysis of lesion-free aortas from children and adults, 333

Albumin uptake

Effect of nicardipine and verapamil on in vitro albumin transport in rabbit thoracic aorta, 80

Alcohol drinking

High density lipoprotein subfractions and coronary risk factors in normal men, 341

Alleles

Two DNA restriction fragment length polymorphisms associated with Ag(t/z) and Ag(g/c) antigenic sites of human apolipoprotein B, 301

Analytic ultracentrifugation

Hyperapobetalipoproteinemia in a kindred with familial combined hyperlipidemia and familial hypercholesterolemia, 211

Animal models

Body fat distribution as a risk factor for coronary artery atherosclerosis in female cynomolgus monkeys, 226

Insulin resistance and impaired glucose tolerance in the atherosclerotic-prone LA/N corpulent rat, 620

Anticoagulant

Modulation of glycosaminoglycan production and antithrombin III binding by cultured aortic endothelial cells treated with 4-methylumbelliferyl- β -D-xyloside, 627

Antigenic determinants

Two DNA restriction fragment length polymorphisms associated with Ag(t/z) and Ag(g/c) antigenic sites of human apolipoprotein B, 301

Antithrombin III

Deficiency of plasma protein S, protein C, or antithrombin III and arterial thrombosis, 456

Modulation of glycosaminoglycan production and antithrombin III binding by cultured aortic endothelial cells treated with 4-methylumbelliferyl- β -D-xyloside, 627

Aorta

Gender and baboon aortic steroid hormone receptors, 248

Aortic aneurysm

Epidemiology of aortic aneurysms: I. Mortality trends in the United States, 1951 to 1981, 637

Aortic esterified cholesterol

Enhanced accumulation and turnover of esterified cholesterol in injured rabbit aorta, 367

Aortic smooth muscle cells

Substratum-bound elastin peptide inhibits aortic smooth muscle cell migration in vitro, 593

Apo C-III

Plasma lipoprotein distribution of apolipoprotein E in familial hypercholesterolemia, 401

Apo E

Plasma lipoprotein distribution of apolipoprotein E in familial hypercholesterolemia, 401

Apolipoprotein

Effect of gender, age, and lipid status on low density lipoprotein subfraction distribution. Results from the Framingham Offspring Study, 483

High density lipoprotein free cholesterol and other lipids in coronary heart disease, 262

Mapping of human apolipoprotein B antigenic determinants, 166

Ninth Annual European Lipoprotein Conference, 436

Apolipoprotein A-I

Correlates of high density lipoprotein cholesterol and apolipoprotein A-I levels in children. The Bogalusa Heart Study, 354

Divergent levels of high density lipoprotein cholesterol and apolipoprotein A-I in children. The Bogalusa Heart Study, 347

Glycosaminoglycans and apolipoproteins B and A-I in human aortas. Chemical and immunological analysis of lesion-free aortas from children and adults, 333

High density lipoprotein free cholesterol and other lipids in coronary heart disease, 262

Hyperapobetalipoproteinemia in a kindred with familial combined hyperlipidemia and familial hypercholesterolemia, 211

Inheritance of high density lipoprotein and lipoprotein lipase and hepatic lipase activity, 421

Apolipoprotein A-I^{Milano} variant

Apolipoprotein A-I^{Milano}. Correlation between high density lipoprotein subclass distribution and triglyceridemia, 426

Apolipoprotein A-II

Inheritance of high density lipoprotein and lipoprotein lipase and hepatic lipase activity, 421

Apolipoprotein B

Apolipoprotein B allotypes MB19₁ and MB19₂ in subjects with coronary artery disease and hypercholesterolemia, 61

Glycosaminoglycans and apolipoproteins B and A-I in human aortas. Chemical and immunological analysis of lesion-free aortas from children and adults, 333

High density lipoprotein free cholesterol and other lipids in coronary heart disease, 262

Hyperapobetalipoproteinemia in a kindred with familial combined hyperlipidemia and familial hypercholesterolemia, 211

Lipoprotein heterogeneity workshop, 315

Two DNA restriction fragment length polymorphisms associated with Ag(t/z) and Ag(g/c) antigenic sites of human apolipoprotein B, 301

Apoprotein B

Familial combined hyperlipidemia workshop, 203

Apoproteins

Body mass, blood pressure, glucose, and lipids. Does plasma insulin explain their relationships? 197

Arterial cholesterol

Regression of experimental atherosclerotic lesions in rhesus monkeys consuming a high saturated fat diet, 125

Arterial collagen

Accelerated rates of collagen synthesis in atherosclerotic arteries quantified in vivo, 470

Arterial compliance

Increased pulse pressure in patients with arteriosclerosis obliterans of the lower limbs, 232

Arterial hypertension

Cigarette smoking and hypertension. Factors independently associated with blood hyperviscosity and arterial rigidity, 572

Arterial stiffness

Cigarette smoking and hypertension. Factors independently associated with blood hyperviscosity and arterial rigidity, 572

Arterial thrombosis

Deficiency of plasma protein S, protein C, or antithrombin III and arterial thrombosis, 456

Arterial wall

Influx and cellular degradation of low density lipoproteins in rabbit aorta determined in an in vitro perfusion system, 565

Arteries

Effect of chronic low dose aspirin on platelet and vascular eicosanoid metabolism in nonhuman primates (*Macaca fascicularis*), 599

Arteriosclerosis

Mass transport, atherogenesis, and risk, 88

Arteriosclerosis obliterans

Increased pulse pressure in patients with arteriosclerosis obliterans of the lower limbs, 232

Artery morphology

Vessel, plaque, and lumen morphology after transluminal balloon angioplasty. Quantitative study in distended human arteries, 306

Aspirin

Aspirin treatment reduces platelet resistance to deformation, 385

Effect of chronic low dose aspirin on platelet and vascular eicosanoid metabolism in nonhuman primates (*Macaca fascicularis*), 599

Atherogenesis

Accumulation of cholesteryl ester and lipid droplets in macrophages after uptake of cholesterol-rich necrotic products, 185

Effect of nicardipine and verapamil on in vitro albumin transport in rabbit thoracic aorta, 80

Fatty streak initiation in Watanabe heritable hyperlipemic and comparably hypercholesterolemic fat-fed rabbits, 9

Atherosclerosis

Accelerated rates of collagen synthesis in atherosclerotic arteries quantified in vivo, 470

Differential distribution of von Willebrand factor in endothelial cells. Comparison between normal pigs and pigs with von Willebrand disease, 47

Distribution of von Willebrand factor in porcine intima varies with blood vessel type and location, 287

Fish oil inhibits development of atherosclerosis in rhesus monkeys, 441

Hereditary hyperlipidemia and atherosclerosis in the rabbit due to overproduction of lipoproteins. II. Preliminary report of arterial pathology, 113

Hereditary hyperlipidemia in the rabbit due to overproduction of lipoproteins. Biochemical studies, 105

Influx and cellular degradation of low density lipoproteins in rabbit aorta determined in an in vitro perfusion system, 565

Insulin resistance and impaired glucose tolerance in the atherosclerotic-prone LA/N corpulent rat, 620

Long-term effects of verapamil on aortic smooth muscle cells cultured in presence of hypercholesterolemic serum, 585

Metabolism of human intermediate and very low density lipoprotein subfractions from normal and dysbetalipoproteinemic plasma. In vivo studies in the rat, 408

Micropipette aspiration of cultured bovine aortic endothelial cells exposed to shear stress, 276

Oxygen consumption in aortic tissue from rabbits with diet-induced atherosclerosis, 238

Personality, gender, and coronary artery atherosclerosis of monkeys, 1

Pregnancy-associated inhibition of coronary artery atherosclerosis in monkeys. Evidence of a relationship with endogenous estrogen, 378

Very low density lipoproteins stimulate cholesteryl ester formation in U937 macrophages. Heterogeneity and biologic variation among normal humans, 35

Vessel, plaque, and lumen morphology after transluminal balloon angioplasty. Quantitative study in distended human arteries, 306

B**Baboon**

Gender and baboon aortic steroid hormone receptors, 248

Balloon angioplasty

Vessel, plaque, and lumen morphology after transluminal balloon angioplasty. Quantitative study in distended human arteries, 306

Balloon deendothelialization

Accumulation of native and methylated low density lipoproteins by healing rabbit arterial wall, 361

Blood platelets

Effect of chronic low dose aspirin on platelet and vascular eicosanoid metabolism in nonhuman primates (*Macaca fascicularis*), 599

Blood pressure

Body mass, blood pressure, glucose, and lipids. Does plasma insulin explain their relationships? 197

High density lipoprotein subfractions and coronary risk factors in normal men, 341

Blood vessels

Regulation of vascular smooth muscle cell growth by endothelial-synthesized extracellular matrices, 463

Body mass index

Body mass, blood pressure, glucose, and lipids. Does plasma insulin explain their relationships? 197

Body weight

High density lipoprotein subfractions and coronary risk factors in normal men, 341

C**Calcium antagonist**

Effect of nicardipine and verapamil on in vitro albumin transport in rabbit thoracic aorta, 80

Cardiovascular disease

Social support and cardiovascular disease, 101

Cardiovascular risk factors

Cigarette smoking and hypertension. Factors independently associated with blood hyperviscosity and arterial rigidity, 572

Cell culture

Regulation of vascular smooth muscle cell growth by endothelial-synthesized extracellular matrices, 463

Cell mechanical properties

Micropipette aspiration of cultured bovine aortic endothelial cells exposed to shear stress, 276

Cell proliferation

Long-term effects of verapamil on aortic smooth muscle cells cultured in presence of hypercholesterolemic serum, 585

Child

Correlates of high density lipoprotein cholesterol and apolipoprotein A-I levels in children. The Bogalusa Heart Study, 354

Divergent levels of high density lipoprotein cholesterol and apolipoprotein A-I in children. The Bogalusa Heart Study, 347

Cholesterol

Effect of gender, age, and lipid status on low density lipoprotein subfraction distribution. Results from the Framingham Offspring Study, 483

Familial combined hyperlipidemia workshop, 203

Ninth Annual European Lipoprotein Conference, 436

- Regression of experimental atherosclerotic lesions in rhesus monkeys consuming a high saturated fat diet, 125
- Total cholesterol and high density lipoprotein cholesterol levels in populations differing in fat and carbohydrate intake, 612
- Cholesterol efflux**
- Effect of verapamil on cholesteryl ester hydrolysis and reesterification in macrophages, 578
- Plasma exchange and low density lipoprotein apheresis in Watanabe heritable hyperlipidemic rabbits, 256
- Cholesterol epidemiology**
- Total cholesterol and high density lipoprotein cholesterol levels in populations differing in fat and carbohydrate intake, 612
- Cholesterol ester transfer protein**
- Ninth Annual European Lipoprotein Conference, 436
- Cholesterol esterification**
- Effect of verapamil on cholesteryl ester hydrolysis and reesterification in macrophages, 578
- Cholesterol esters**
- Very low density lipoproteins stimulate cholesteryl ester formation in U937 macrophages. Heterogeneity and biologic variation among normal humans, 35
- Cholesterol-rich necrotic products**
- Accumulation of cholesteryl ester and lipid droplets in macrophages after uptake of cholesterol-rich necrotic products, 185
- Cholesterol synthesis inhibitors**
- Hydroxymethylglutaryl-coenzyme A reductase exhibits graded distribution in normal and mevinolin-treated ileum, 144
- Cholesteryl ester accumulation**
- Low density lipoprotein metabolism in human macrophages stimulated with microbial or microbial-related products, 176
- Cholesteryl ester hydrolysis**
- Effect of verapamil on cholesteryl ester hydrolysis and reesterification in macrophages, 578
- Cholesteryl ester synthesis**
- Low density lipoprotein metabolism in human macrophages stimulated with microbial or microbial-related products, 176
- Cholesteryl ester transfer protein**
- Synthesis and secretion of plasma cholesteryl ester transfer protein by human hepatocarcinoma cell line, HepG2, 267
- Cholesteryl esters**
- Long-term effects of verapamil on aortic smooth muscle cells cultured in presence of hypercholesterolemic serum, 585
- Cholesteryl-rich lipoproteins**
- Lipoprotein heterogeneity workshop, 315
- Chondroitin sulfate**
- Modulation of glycosaminoglycan production and antithrombin III binding by cultured aortic endothelial cells treated with 4-methylumbelliferyl- β -D-xyloside, 627
- Cigarette smoking**
- Cigarette smoking and hypertension. Factors independently associated with blood hyperviscosity and arterial rigidity, 572
- Correlates of high density lipoprotein cholesterol and apolipoprotein A-I levels in children. The Bogalusa Heart Study, 354
- Coagulation indices**
- Influence of dietary fats on blood coagulation and prostaglandin production in the common marmoset, 159
- Collagen**
- Accelerated rates of collagen synthesis in atherosclerotic arteries quantified in vivo, 470
- Glycosaminoglycans and apolipoproteins B and A-I in human aortas. Chemical and immunological analysis of lesion-free aortas from children and adults, 333
- Collagen synthesis in atherosclerotic arteries**
- Accelerated rates of collagen synthesis in atherosclerotic arteries quantified in vivo, 470
- Collagen synthesis in vivo**
- Accelerated rates of collagen synthesis in atherosclerotic arteries quantified in vivo, 470
- Coronary arteries**
- Pregnancy-associated inhibition of coronary artery atherosclerosis in monkeys. Evidence of a relationship with endogenous estrogen, 378
- Coronary artery atherosclerosis**
- Body fat distribution as a risk factor for coronary artery atherosclerosis in female cynomolgus monkeys, 226
- Coronary artery disease**

- Efflux**
- Enhanced accumulation and turnover of esterified cholesterol in injured rabbit aorta, 367
- Electron microscopy**
- Hereditary hyperlipidemia and atherosclerosis in the rabbit due to overproduction of lipoproteins. II. Preliminary report of arterial pathology, 113

Endothelial cell matrix

Interleukin-1 inhibits the synthesis of von Willebrand factor in endothelial cells, which results in a decreased reactivity of their matrix toward platelets, 605

Endothelial cells

Differential distribution of von Willebrand factor in endothelial cells. Comparison between normal pigs and pigs with von Willebrand disease, 47

Modulation of glycosaminoglycan production and antithrombin III binding by cultured aortic endothelial cells treated with 4-methylumbelliferyl- β -D-xyloside, 627

Production of plasminogen activators and inhibitor by serially propagated endothelial cells from adult human blood vessels, 389

Endothelial gap fractional area

Mass transport, atherogenesis, and risk, 88

Endothelial retraction

Fatty streak expansion and maturation in Watanabe heritable hyperlipemic and comparably hypercholesterolemic fat-fed rabbits, 24

Endothelium

Distribution of von Willebrand factor in porcine intima varies with blood vessel type and location, 287

Effect of chronic low dose aspirin on platelet and vascular eicosanoid metabolism in nonhuman primates (*Macaca fascicularis*), 599

Effect of nicardipine and verapamil on in vitro albumin transport in rabbit thoracic aorta, 80

Micropipette aspiration of cultured bovine aortic endothelial cells exposed to shear stress, 276

Epidemiology

Epidemiology of aortic aneurysms: I. Mortality trends in the United States, 1951 to 1981, 637

Ninth Annual European Lipoprotein Conference, 436

Social support and cardiovascular disease, 101

Total cholesterol and high density lipoprotein cholesterol levels in populations differing in fat and carbohydrate intake, 612

Epitopes

Mapping of human apolipoprotein B antigenic determinants, 166

Equilibrium density gradient ultracentrifugation

Hyperapobetalipoproteinemia in a kindred with familial combined hyperlipidemia and familial hypercholesterolemia, 211

Esterified cholesterol

Glycosaminoglycans and apolipoproteins B and A-I in human aortas. Chemical and immunological analysis of lesion-free aortas from children and adults, 333

Estradiol

Pregnancy-associated inhibition of coronary artery atherosclerosis in monkeys. Evidence of a relationship with endogenous estrogen, 378

Exertion

High density lipoprotein subfractions and coronary risk factors in normal men, 341

Extracellular matrix

Regulation of vascular smooth muscle cell growth by endothelial-synthesized extracellular matrices, 463

F**Familial hypercholesterolemia**

Plasma lipoprotein distribution of apolipoprotein E in familial hypercholesterolemia, 401

Fat distribution

Body fat distribution as a risk factor for coronary artery atherosclerosis in female cynomolgus monkeys, 226

Fatty acids

Influence of dietary fats on blood coagulation and prostaglandin production in the common marmoset, 159

Unsaturated fatty acids enhance low density lipoprotein uptake and degradation by peripheral blood mononuclear cells, 450

Fatty streak

Fatty streak expansion and maturation in Watanabe heritable hyperlipemic and comparably hypercholesterolemic fat-fed rabbits, 24

Fatty streak initiation in Watanabe heritable hyperlipemic and comparably hypercholesterolemic fat-fed rabbits, 9

Fibrinolysis

Production of plasminogen activators and inhibitor by serially propagated endothelial cells from adult human blood vessels, 389

Fish oil

Alteration of high density lipoprotein subfractions of nonhuman primates fed fish-oil diets. Selective lowering of HDL subfractions of intermediate size and density, 71

Fish oil inhibits development of atherosclerosis in rhesus monkeys, 441

Foam cells

Decrease in reactive amino groups during oxidation or endothelial cell modification of LDL. Correlation with changes in receptor-mediated catabolism, 135

Fatty streak initiation in Watanabe heritable hyperlipemic and comparably hypercholesterolemic fat-fed rabbits, 9

Modification of very low density lipoproteins leads to macrophage scavenger receptor uptake and cholesteryl ester deposition, 191

Free cholesterol

Glycosaminoglycans and apolipoproteins B and A-I in human aortas. Chemical and immunological analysis of lesion-free aortas from children and adults, 333

G**Gender**

Gender and baboon aortic steroid hormone receptors, 248

Gender comparisons

Effect of gender, age, and lipid status on low density lipoprotein subfraction distribution. Results from the Framingham Offspring Study, 483

Genes

Ninth Annual European Lipoprotein Conference, 436

Genetics

Lipoprotein heterogeneity workshop, 315

Glucose

Body mass, blood pressure, glucose, and lipids. Does plasma insulin explain their relationships? 197

Glucose tolerance

Insulin resistance and impaired glucose tolerance in the atherosclerotic-prone LA/N corpulent rat, 620

Glycosaminoglycans

Glycosaminoglycans and apolipoproteins B and A-I in human aortas. Chemical and immunological analysis of lesion-free aortas from children and adults, 333

Modulation of glycosaminoglycan production and antithrombin III binding by cultured aortic endothelial cells treated with 4-methylumbelliferyl- β -D-xyloside, 627

Regulation of vascular smooth muscle cell growth by endothelial-synthesized extracellular matrices, 463

Glycosylated hemoglobin

Population-based study of glycosylated hemoglobin, lipids, and lipoproteins in nondiabetic adults, 66

Gradient gel electrophoresis

Apolipoprotein A-I^{Milano}. Correlation between high density lipoprotein subclass distribution and triglyceridemia, 426

Effect of gender, age, and lipid status on low density lipoprotein subfraction distribution. Results from the Framingham Offspring Study, 483

Gradients in ileal hydroxymethylglutaryl-coenzyme A reductase

Hydroxymethylglutaryl-coenzyme A reductase exhibits graded distribution in normal and mevinolin-treated ileum, 144

Growth

Regulation of vascular smooth muscle cell growth by endothelial-synthesized extracellular matrices, 463

H**Healing aorta**

Accumulation of native and methylated low density lipoproteins by healing rabbit arterial wall, 361

Heart rate

Physiological markers of smoking and their relation to coronary heart disease. The Lipid Research Clinics Coronary Primary Prevention Trial, 477

Hematocrit

Physiological markers of smoking and their relation to coronary heart disease. The Lipid Research Clinics Coronary Primary Prevention Trial, 477

Hemodynamics

Micropipette aspiration of cultured bovine aortic endothelial cells exposed to shear stress, 276

Heparin

Regulation of vascular smooth muscle cell growth by endothelial-synthesized extracellular matrices, 463

Heparin sulfate

Modulation of glycosaminoglycan production and antithrombin III binding by cultured aortic endothelial cells treated with 4-methylumbelliferyl- β -D-xyloside, 627

Hepatic lipase

Inheritance of high density lipoprotein and lipoprotein lipase and hepatic lipase activity, 421

Hereditary hyperlipidemia

Hereditary hyperlipidemia in the rabbit due to overproduction of lipoproteins. Biochemical studies, 105

Heritability

Inheritance of high density lipoprotein and lipoprotein lipase and hepatic lipase activity, 421

Ninth Annual European Lipoprotein Conference, 436

High density lipoprotein cholesterol

Divergent levels of high density lipoprotein cholesterol and apolipoprotein A-I in children. The Bogalusa Heart Study, 347

High density lipoprotein subfractions and coronary risk factors in normal men, 341

Pregnancy-associated inhibition of coronary artery atherosclerosis in monkeys. Evidence of a relationship with endogenous estrogen, 378

Workshop on monounsaturated fatty acids, 644

High density lipoprotein composition

Plasma exchange and low density lipoprotein apheresis in Watanabe heritable hyperlipidemic rabbits, 256

High density lipoprotein phospholipids

High density lipoprotein free cholesterol and other lipids in coronary heart disease, 262

High density lipoprotein receptor

Downregulation of high density lipoprotein receptor activity of cultured fibroblasts by platelet-derived growth factor, 325

High density lipoprotein specific activity

Plasma exchange and low density lipoprotein apheresis in Watanabe heritable hyperlipidemic rabbits, 256

High density lipoprotein subfractions

Alteration of high density lipoprotein subfractions of nonhuman primates fed fish-oil diets. Selective lowering of HDL subfractions of intermediate size and density, 71

Apolipoprotein A-I_{Milano}. Correlation between high density lipoprotein subclass distribution and triglyceridemia, 426

High density lipoprotein total, free, and esterified cholesterol

High density lipoprotein free cholesterol and other lipids in coronary heart disease, 262

High density lipoproteins

Inheritance of high density lipoprotein and lipoprotein lipase and hepatic lipase activity, 421

Lack of sex differences in high density lipoproteins in Pima Indians. Studies of obesity, lipase activities, and steroid hormones, 292

Lipoprotein heterogeneity workshop, 315

Total cholesterol and high density lipoprotein cholesterol levels in populations differing in fat and carbohydrate intake, 612

Human aorta

Production of plasminogen activators and inhibitor by serially propagated endothelial cells from adult human blood vessels, 389

Human hepatocarcinoma cell line HepG2

Synthesis and secretion of plasma cholesteryl ester transfer protein by human hepatocarcinoma cell line, HepG2, 267

Human plasma neutral lipid transfer protein

Synthesis and secretion of plasma cholesteryl ester transfer protein by human hepatocarcinoma cell line, HepG2, 267

Hypercholesterolemia

Apolipoprotein B allotypes MB19₁ and MB19₂ in subjects with coronary artery disease and hypercholesterolemia, 61

Hereditary hyperlipidemia in the rabbit due to overproduction of lipoproteins. Biochemical studies, 105

Mass transport, atherogenesis, and risk, 88

Hypertension

Increased pulse pressure in patients with arteriosclerosis obliterans of the lower limbs, 232

Mass transport, atherogenesis, and risk, 88

I**¹²⁵I-albumin**

Mass transport, atherogenesis, and risk, 88

¹²⁵I-low density lipoprotein

Mass transport, atherogenesis, and risk, 88

In vitro

Oxygen consumption in aortic tissue from rabbits with diet-induced atherosclerosis, 238

Influx

Enhanced accumulation and turnover of esterified cholesterol in injured rabbit aorta, 367

Injured rabbit aorta

Enhanced accumulation and turnover of esterified cholesterol in injured rabbit aorta, 367

Insulin

Body mass, blood pressure, glucose, and lipids. Does plasma insulin explain their relationships? 197

Insulin resistance

Insulin resistance and impaired glucose tolerance in the atherosclerotic-prone LA/N corpulent rat, 620

 γ -interferon-stimulated human macrophages

Low density lipoprotein metabolism in human macrophages stimulated with microbial or microbial-related products, 176

Interleukin-1

Interleukin-1 inhibits the synthesis of von Willebrand factor in endothelial cells, which results in a decreased reactivity of their matrix toward platelets, 605

Intermediate density lipoproteins

Metabolism of human intermediate and very low density lipoprotein subfractions from normal and dysbetalipoproteinemic plasma. In vivo studies in the rat, 408

Intima

Glycosaminoglycans and apolipoproteins B and A-I in human aortas. Chemical and immunological analysis of lesion-free aortas from children and adults, 333

Intimal thickening

Mass transport, atherogenesis, and risk, 88

Iodination

Accumulation of native and methylated low density lipoproteins by healing rabbit arterial wall, 361

L**LA/N-cp rat**

Insulin resistance and impaired glucose tolerance in the atherosclerotic-prone LA/N corpulent rat, 620

Lecithin-cholesterol acyltransferase

Ninth Annual European Lipoprotein Conference, 436

Lipases

Lack of sex differences in high density lipoproteins in Pima Indians. Studies of obesity, lipase activities, and steroid hormones, 292

Lipid metabolism

Ninth Annual European Lipoprotein Conference, 436

Lipid peroxidation

Decrease in reactive amino groups during oxidation or endothelial cell modification of LDL. Correlation with changes in receptor-mediated catabolism, 135

Lipid transfer protein-I

Synthesis and secretion of plasma cholesteryl ester transfer protein by human hepatocarcinoma cell line, HepG2, 267

Lipids

Correlates of high density lipoprotein cholesterol and apolipoprotein A-I levels in children. The Bogalusa Heart Study, 354
Divergent levels of high density lipoprotein cholesterol and apolipoprotein A-I in children. The Bogalusa Heart Study, 347
Population-based study of glycosylated hemoglobin, lipids, and lipoproteins in nondiabetic adults, 66

Lipopolysaccharide-stimulated human macrophages

Low density lipoprotein metabolism in human macrophages stimulated with microbial or microbial-related products, 176

Lipoprotein kinetics

Hereditary hyperlipidemia in the rabbit due to overproduction of lipoproteins. Biochemical studies, 105

Lipoprotein lipase

Inheritance of high density lipoprotein and lipoprotein lipase and hepatic lipase activity, 421
Ninth Annual European Lipoprotein Conference, 436

Lipoprotein metabolism

Metabolism of human intermediate and very low density lipoprotein subfractions from normal and dysbetalipoproteinemic plasma. In vivo studies in the rat, 408

Lipoprotein subspecies

Metabolism of human intermediate and very low density lipoprotein subfractions from normal and dysbetalipoproteinemic plasma. In vivo studies in the rat, 408

Lipoprotein-deficient plasma

Plasma exchange and low density lipoprotein apheresis in Watanabe heritable hyperlipidemic rabbits, 256

Lipoproteins

Body mass, blood pressure, glucose, and lipids. Does plasma insulin explain their relationships? 197
Correlates of high density lipoprotein cholesterol and apolipoprotein A-I levels in children. The Bogalusa Heart Study, 354
Familial combined hyperlipidemia workshop, 203
High density lipoprotein subfractions and coronary risk factors in normal men, 341
Hyperapobetalipoproteinemia in a kindred with familial combined hyperlipidemia and familial hypercholesterolemia, 211
Lipoprotein heterogeneity workshop, 315
Metabolism of human intermediate and very low density lipoprotein subfractions from normal and dysbetalipoproteinemic plasma. In vivo studies in the rat, 408
Ninth Annual European Lipoprotein Conference, 436
Population-based study of glycosylated hemoglobin, lipids, and lipoproteins in nondiabetic adults, 66
Workshop on monounsaturated fatty acids, 644

Liver

Ninth Annual European Lipoprotein Conference, 436

Low density lipoprotein cholesterol

Workshop on monounsaturated fatty acids, 644

Low density lipoprotein metabolism

Low density lipoprotein metabolism in human macrophages stimulated with microbial or microbial-related products, 176

Low density lipoprotein modification

Decrease in reactive amino groups during oxidation or endothelial cell modification of LDL. Correlation with changes in receptor-mediated catabolism, 135

Low density lipoprotein receptors

Fatty streak expansion and maturation in Watanabe heritable hyperlipemic and comparably hypercholesterolemic fat-fed rabbits, 24

Fatty streak initiation in Watanabe heritable hyperlipemic and comparably hypercholesterolemic fat-fed rabbits, 9

Hyperapobetalipoproteinemia in a kindred with familial combined hyperlipidemia and familial hypercholesterolemia, 211

Very low density lipoproteins stimulate cholesteryl ester formation in U937 macrophages. Heterogeneity and biologic variation among normal humans, 35

Low density lipoprotein subfractions

Effect of gender, age, and lipid status on low density lipoprotein subfraction distribution. Results from the Framingham Offspring Study, 483

Low density lipoproteins

Accumulation of native and methylated low density lipoproteins by healing rabbit arterial wall, 361

Apolipoprotein B allotypes MB19₁ and MB19₂ in subjects with coronary artery disease and hypercholesterolemia, 61

Influx and cellular degradation of low density lipoproteins in rabbit aorta determined in an in vitro perfusion system, 565

Metabolism of human intermediate and very low density lipoprotein subfractions from normal and dysbetalipoproteinemic plasma. In vivo studies in the rat, 408

Superoxide initiates oxidation of low density lipoprotein by human monocytes, 55

Unsaturated fatty acids enhance low density lipoprotein uptake and degradation by peripheral blood mononuclear cells, 450

M**Macrophage-derived foam cell**

Fatty streak expansion and maturation in Watanabe heritable hyperlipemic and comparably hypercholesterolemic fat-fed rabbits, 24

Macrophages

Accumulation of cholesteryl ester and lipid droplets in macrophages after uptake of cholesterol-rich necrotic products, 185

Decrease in reactive amino groups during oxidation or endothelial cell modification of LDL. Correlation with changes in receptor-mediated catabolism, 135

Effect of verapamil on cholesteryl ester hydrolysis and reesterification in macrophages, 578

Very low density lipoproteins stimulate cholesteryl ester formation in U937 macrophages. Heterogeneity and biologic variation among normal humans, 35

Marmosets

Influence of dietary fats on blood coagulation and prostaglandin production in the common marmoset, 159

Mathematical model

Mass transport, atherogenesis, and risk, 88

Membrane lipids

Unsaturated fatty acids enhance low density lipoprotein uptake and degradation by peripheral blood mononuclear cells, 450

Metabolism

Lipoprotein heterogeneity workshop, 315

Methyl low density lipoprotein

Accumulation of native and methylated low density lipoproteins by healing rabbit arterial wall, 361

Migration

Substratum-bound elastin peptide inhibits aortic smooth muscle cell migration in vitro, 593

Modified lipoproteins

Modification of very low density lipoproteins leads to macrophage scavenger receptor uptake and cholesteryl ester deposition, 191

Molecular sieving

Mass transport, atherogenesis, and risk, 88

Monkeys

Personality, gender, and coronary artery atherosclerosis of monkeys, 1

Monoclonal antibodies

Apolipoprotein B allotypes MB19₁ and MB19₂ in subjects with coronary artery disease and hypercholesterolemia, 61

Mapping of human apolipoprotein B antigenic determinants, 166

Monocyte/macrophage

Fatty streak initiation in Watanabe heritable hyperlipemic and comparably hypercholesterolemic fat-fed rabbits, 9

Monocytes

Superoxide initiates oxidation of low density lipoprotein by human monocytes, 55

Very low density lipoproteins stimulate cholesteryl ester formation in U937 macrophages. Heterogeneity and biologic variation among normal humans, 35

Mortality

Epidemiology of aortic aneurysms: I. Mortality trends in the United States, 1951 to 1981, 637

N**Nonhuman primates**

Alteration of high density lipoprotein subfractions of nonhuman primates fed fish-oil diets. Selective lowering of HDL subfractions of intermediate size and density, 71

Body fat distribution as a risk factor for coronary artery atherosclerosis in female cynomolgus monkeys, 226

O**Obesity**

Body fat distribution as a risk factor for coronary artery atherosclerosis in female cynomolgus monkeys, 226

Body mass, blood pressure, glucose, and lipids. Does plasma insulin explain their relationships? 197

Correlates of high density lipoprotein cholesterol and apolipoprotein A-I levels in children. The Bogalusa Heart Study, 354

Lack of sex differences in high density lipoproteins in Pima Indians. Studies of obesity, lipase activities, and steroid hormones, 292

Total cholesterol and high density lipoprotein cholesterol levels in populations differing in fat and carbohydrate intake, 612

Oleic acid

Workshop on monounsaturated fatty acids, 644

Omega-3 fatty acids

Alteration of high density lipoprotein subfractions of nonhuman primates fed fish-oil diets. Selective lowering of HDL subfractions of intermediate size and density, 71

Fish oil inhibits development of atherosclerosis in rhesus monkeys, 441

Oral contraceptives

Correlates of high density lipoprotein cholesterol and apolipoprotein A-I levels in children. The Bogalusa Heart Study, 354

Oxidation

Superoxide initiates oxidation of low density lipoprotein by human monocytes, 55

Oxygen consumption

Oxygen consumption in aortic tissue from rabbits with diet-induced atherosclerosis, 238

P**Perfusion**

Oxygen consumption in aortic tissue from rabbits with diet-induced atherosclerosis, 238

Perfusion fixation

Vessel, plaque, and lumen morphology after transluminal balloon angioplasty. Quantitative study in distended human arteries, 306

Phenotypes

Two DNA restriction fragment length polymorphisms associated with Ag(t/z) and Ag(g/c) antigenic sites of human apolipoprotein B, 301

Phospholipase A₂

Decrease in reactive amino groups during oxidation or endothelial cell modification of LDL. Correlation with changes in receptor-mediated catabolism, 135

Plasma lipoproteins

Alteration of high density lipoprotein subfractions of nonhuman primates fed fish-oil diets. Selective lowering of HDL subfractions of intermediate size and density, 71

Effect of gender, age, and lipid status on low density lipoprotein subfraction distribution. Results from the Framingham Offspring Study, 483

Plasma and blood viscosity

Cigarette smoking and hypertension. Factors independently associated with blood hyperviscosity and arterial rigidity, 572

Plasminogen activator inhibitor

Production of plasminogen activators and inhibitor by serially propagated endothelial cells from adult human blood vessels, 389

Plasminogen activators

Production of plasminogen activators and inhibitor by serially propagated endothelial cells from adult human blood vessels, 389

Platelet

Aspirin treatment reduces platelet resistance to deformation, 385

Platelet adhesion

Interleukin-1 inhibits the synthesis of von Willebrand factor in endothelial cells, which results in a decreased reactivity of their matrix toward platelets, 605

Platelet aggregation

Influence of dietary fats on blood coagulation and prostaglandin production in the common marmoset, 159

Platelet-derived chemotactic factors

Substratum-bound elastin peptide inhibits aortic smooth muscle cell migration in vitro, 593

Platelet-derived growth factor

Dipyridamole decreases platelet-derived growth factor levels in human serum, 152

Downregulation of high density lipoprotein receptor activity of cultured fibroblasts by platelet-derived growth factor, 325

Polymorphism

Ninth Annual European Lipoprotein Conference, 436

Two DNA restriction fragment length polymorphisms associated with Ag(t/z) and Ag(g/c) antigenic sites of human apolipoprotein B, 301

Porcine von Willebrand disease

Differential distribution of von Willebrand factor in endothelial cells. Comparison between normal pigs and pigs with von Willebrand disease, 47

Pregnancy

Pregnancy-associated inhibition of coronary artery atherosclerosis in monkeys. Evidence of a relationship with endogenous estrogen, 378

Primates

Effect of chronic low dose aspirin on platelet and vascular eicosanoid metabolism in nonhuman primates (*Macaca fascicularis*), 599

Progesterone

Pregnancy-associated inhibition of coronary artery atherosclerosis in monkeys. Evidence of a relationship with endogenous estrogen, 378

Prostacyclin

Influence of dietary fats on blood coagulation and prostaglandin production in the common marmoset, 159

Prostaglandins

Effect of chronic low dose aspirin on platelet and vascular eicosanoid metabolism in nonhuman primates (*Macaca fascicularis*), 599

Protein C

Deficiency of plasma protein S, protein C, or antithrombin III and arterial thrombosis, 456

Protein S

Deficiency of plasma protein S, protein C, or antithrombin III and arterial thrombosis, 456

Proteoglycan

Modulation of glycosaminoglycan production and antithrombin III binding by cultured aortic endothelial cells treated with 4-methylumbelliferyl- β -D-xyloside, 627

Psychosocial factors

Social support and cardiovascular disease, 101

Psychosocial stress

Personality, gender, and coronary artery atherosclerosis of monkeys, 1

Pulse pressure

Increased pulse pressure in patients with arteriosclerosis obliterans of the lower limbs, 232

R**Rabbit**

Accumulation of native and methylated low density lipoproteins by healing rabbit arterial wall, 361

Hereditary hyperlipidemia and atherosclerosis in the rabbit due to overproduction of lipoproteins. II. Preliminary report of arterial pathology, 113

Rabbit aorta

Effect of nicardipine and verapamil on in vitro albumin transport in rabbit thoracic aorta, 80

Radiolimmunoassay

Apolipoprotein B allotypes MB19, and MB19₂ in subjects with coronary artery disease and hypercholesterolemia, 61

Rate zonal ultracentrifugation

Apolipoprotein A-I_{Milano}. Correlation between high density lipoprotein subclass distribution and triglyceridemia, 426

Restriction fragment linked polymorphism

Ninth Annual European Lipoprotein Conference, 436

Rhesus monkeys

Fish oil inhibits development of atherosclerosis in rhesus monkeys, 441

Risk factors

Ninth Annual European Lipoprotein Conference, 436

Social support and cardiovascular disease, 101

S**Saturated, monounsaturated polyunsaturated fatty acids**

Workshop on monounsaturated fatty acids, 644

Scavenger receptor

Modification of very low density lipoproteins leads to macrophage scavenger receptor uptake and cholesteryl ester deposition, 191

Scleroderma

Dipyridamole decreases platelet-derived growth factor levels in human serum, 152

Serial propagation

Production of plasminogen activators and inhibitor by serially propagated endothelial cells from adult human blood vessels, 389

Serum mitogen

Dipyridamole decreases platelet-derived growth factor levels in human serum, 152

Sex differences

Lack of sex differences in high density lipoproteins in Pima Indians. Studies of obesity, lipase activities, and steroid hormones, 292

Sexual maturation

Correlates of high density lipoprotein cholesterol and apolipoprotein A-I levels in children. The Bogalusa Heart Study, 354

Small intestine

Hydroxymethylglutaryl-coenzyme A reductase exhibits graded distribution in normal and mevionin-treated ileum, 144

Smoking

High density lipoprotein subfractions and coronary risk factors in normal men, 341

Smooth muscle

Fatty streak expansion and maturation in Watanabe heritable hyperlipemic and comparably hypercholesterolemic fat-fed rabbits, 24

Fatty streak initiation in Watanabe heritable hyperlipemic and comparably hypercholesterolemic fat-fed rabbits, 9

Smooth muscle cells

Long-term effects of verapamil on aortic smooth muscle cells cultured in presence of hypercholesterolemic serum, 585

Spontaneous hyperlipidemia

Hereditary hyperlipidemia and atherosclerosis in the rabbit due to overproduction of lipoproteins. II. Preliminary report of arterial pathology, 113

Steroid hormone receptors

Gender and baboon aortic steroid hormone receptors, 248

Steroid hormones

Lack of sex differences in high density lipoproteins in Pima Indians. Studies of obesity, lipase activities, and steroid hormones, 292

Superoxide

Superoxide initiates oxidation of low density lipoprotein by human monocytes, 55

T**Technetium-labelling**

Accumulation of native and methylated low density lipoproteins by healing rabbit arterial wall, 361

Thromboxane

Influence of dietary fats on blood coagulation and prostaglandin production in the common marmoset, 159

Thromboxane A₂

Effect of chronic low dose aspirin on platelet and vascular eicosanoid metabolism in nonhuman primates (*Macaca fascicularis*), 599

 α -Tocopherol

Influence of dietary fats on blood coagulation and prostaglandin production in the common marmoset, 159

Total plasma cholesterol

Pregnancy-associated inhibition of coronary artery atherosclerosis in monkeys. Evidence of a relationship with endogenous estrogen, 378

Total protein

Glycosaminoglycans and apolipoproteins B and A-I in human aortas. Chemical and immunological analysis of lesion-free aortas from children and adults, 333

Triglyceride-rich lipoproteins

Lipoprotein heterogeneity workshop, 315

Triglyceridemia

Apolipoprotein A-I_{Milano}. Correlation between high density lipoprotein subclass distribution and triglyceridemia, 426

Triglycerides

Effect of gender, age, and lipid status on low density lipoprotein subfraction distribution. Results from the Framingham Offspring Study, 483

Familial combined hyperlipidemia workshop, 203

High density lipoprotein subfractions and coronary risk factors in normal men, 341

Ninth Annual European Lipoprotein Conference, 436

Turnover

Enhanced accumulation and turnover of esterified cholesterol in injured rabbit aorta, 367

Twin studies

Inheritance of high density lipoprotein and lipoprotein lipase and hepatic lipase activity, 421

U**U937 cells**

Very low density lipoproteins stimulate cholesteryl ester formation in U937 macrophages. Heterogeneity and biologic variation among normal humans, 35

Urokinase

Production of plasminogen activators and inhibitor by serially propagated endothelial cells from adult human blood vessels, 389

V

Vascular endothelium

Regulation of vascular smooth muscle cell growth by endothelial-synthesized extracellular matrices, 463

Vascular smooth muscle

Regulation of vascular smooth muscle cell growth by endothelial-synthesized extracellular matrices, 463

Veins

Effect of chronic low dose aspirin on platelet and vascular eicosanoid metabolism in nonhuman primates (*Macaca fascicularis*), 599

Venous thrombosis

Deficiency of plasma protein S, protein C, or antithrombin III and arterial thrombosis, 456

Verapamil

Effect of verapamil on cholesteryl ester hydrolysis and reesterification in macrophages, 578

Long-term effects of verapamil on aortic smooth muscle cells cultured in presence of hypercholesterolemic serum, 585

Very low density lipoproteins

Metabolism of human intermediate and very low density lipoprotein subfractions from normal and dysbetalipoproteinemic plasma. In vivo studies in the rat, 408

Modification of very low density lipoproteins leads to macrophage scavenger receptor uptake and cholesteryl ester deposition, 191

Very low density lipoproteins stimulate cholesteryl ester formation in U937 macrophages. Heterogeneity and biologic variation among normal humans, 35

von Willebrand disease

Distribution of von Willebrand factor in porcine intima varies with blood vessel type and location, 287

von Willebrand factor

Differential distribution of von Willebrand factor in endothelial cells. Comparison between normal pigs and pigs with von Willebrand disease, 47

Distribution of von Willebrand factor in porcine intima varies with blood vessel type and location, 287

Interleukin-1 inhibits the synthesis of von Willebrand factor in endothelial cells, which results in a decreased reactivity of their matrix toward platelets, 605

W

Wall shear stress

Micropipette aspiration of cultured bovine aortic endothelial cells exposed to shear stress, 276

White blood cell count

Physiological markers of smoking and their relation to coronary heart disease. The Lipid Research Clinics Coronary Primary Prevention Trial, 477

X

Xanthoma

Hyperapobetalipoproteinemia in a kindred with familial combined hyperlipidemia and familial hypercholesterolemia, 211

B-D-Xyloside

Modulation of glycosaminoglycan production and antithrombin III binding by cultured aortic endothelial cells treated with 4-methylumbelliferyl-B-D-xyloside, 627
